

# Mei Baby Water Purifier

Premium Kitchen Water Purification System for Families

---

## Product Description

**Mei Baby** is a premium kitchen water purifier designed specifically for families with babies and young children. This specialized system provides exceptional protection when preparing formula, baby food, and beverages for your little ones.

### Enhanced Baby Protection Technology

Featuring extended 10-minute UV sterilization cycle for complete safety

## Key Features

## Enhanced Baby Protection

Infants are significantly more vulnerable to waterborne infections. The Mei Baby's extended 10-minute UV sterilization cycle ensures every drop is completely safe—even stagnant water in pipes.

## Eliminates Stagnant Water Risks

Water that sits in pipes between uses can become a breeding ground for harmful bacteria. Mei Baby destroys 99.9% of bacteria through comprehensive extended sterilization.

## Scientifically Validated Performance

Delivers enhanced microbial purification that has been scientifically proven, providing complete confidence with every bottle you prepare for your baby.

## Purpose-Built for Families

Unlike generic water systems designed for general use, Mei Baby was specifically engineered with a deep understanding of the unique needs of babies and young children.

## Pure Water, Pure Love

Just as you wouldn't compromise when sterilizing bottles, you shouldn't compromise on water quality. Mei Baby delivers pure water that reflects your pure love for your child.

## Additional Benefits

### **Quality Assured -**

- ✓ Manufactured under strict quality standards

**Versatile Use** - Perfect for formula preparation, baby food, drinking water and cooking

**User-Friendly** - Simple one-handle operation

**Quiet & Stylish** - Convenient operation with elegantly designed dispensing faucet

**Smart Monitoring** - Built-in alert system for malfunction detection

**24/7 Protection** - Eliminates bacterial growth risk even during overnight periods

**Peace of Mind** - Complete confidence for health-conscious parents

**Universal Fit** - Seamlessly integrates into any kitchen design

**Low Maintenance** - Requires annual servicing only

**Sabbath-Compliant** - Approved by the Tzomet Institute for observant households

## Advanced Technology

Our system combines intelligent filtration technology with Ultraviolet sterilization, featuring an enhanced 10-minute purification cycle after each activation. Every component is engineered to deliver exceptionally high quality water while preserving essential natural minerals.

## Multi-Stage Purification Process

## 1 **Stage 1: Multi-Stage Micron Filtration**

- Initial 5-micron filtration removes sand, rust, suspended particles and solid debris
- Secondary filtration uses OMNIPURE® OMB934-5M activated carbon to eliminate odors, aftertastes, chlorine, and microplastic particles

## 2 **Stage 2: Sub-Micron Deep Purification**

- Final 0.5-micron filtration stage using compressed carbon filter OMB934-0.5ML (manufactured by OMNIPURE USA)
- Treats chemical contaminants and volatile organic compounds (THMs) including:
  - Bromoform
  - Chloroform
  - Bromodichloromethane
  - Dibromochloromethane

## 3 **Stage 3: Heavy Metal Protection**

- Effectively removes lead and other organic/inorganic contaminants

## 4 **Stage 4: UV Sterilization & Disinfection**

- Powerful **10-minute sterilization cycle** eliminates bacteria and viruses after each use
- Features high-performance ultraviolet quartz lamp by **Light Sources USA**

- Incorporates C.P.S (Continuous Purification System) technology for ongoing protection
- Prevents contamination and ensures continuous purification between uses

### The Result

Clean, delicious and safe water - every single time.

## Technical Specifications

Specification	Value	Description
UV Intensity	44,000Mw/Sec/Cm	Ultraviolet sterilization power
Final Filtration	0.5 micron	Sub-micron filtration level
Min. Pressure	1.5 bar	Minimum water pressure required
Max. Pressure	6.0 bar	Maximum operating pressure
Max. Flow	2.0L/min	Maximum recommended flow rate

Specification	Value	Description
Faucet Material	Stainless Steel SS-304	High quality dispensing faucet
Voltage	220V AC	Power supply requirement
Current	1.25A	Electrical current consumption
Frequency	50-60 Hz	Operating frequency range
Wattage	14W	Power consumption
Height	38.0 cm	Unit dimensions
Width	28.0 cm	Unit dimensions
Depth	14.0 cm	Unit dimensions
Weight	3.5 kg	Total unit weight

 *For detailed performance data, see our laboratory test results certified by the Israel Standards Institute, including comprehensive chemical and microbiological analyses.*
