

MR-33 Smart UV

Premium Under-Counter Water Purifier for your Kitchen with Multi-Stage Filtration & Continuous UV Purification

Product Description

MR-33 Smart UV Under-Counter Water Purifier for Kitchen including 2 Carbon Filters, UV Lamp and Stainless Steel dedicated Faucet. A premium solution designed specifically for families seeking the highest level of water purification technology.

Multi-Stage Filtration with Continuous UV Purification

Smart Water Purification Technology – For Safe Daily Consumption

The MR-33 Smart UV system is designed for purifying drinking water, cooking water, and water for rinsing fruits and vegetables, all while maintaining consistently high water quality. The system is installed under the sink and offers quiet, advanced, and reliable operation – saving space without requiring daily operational intervention.

Key Features

Continuous Microbial Purification with UV Lamp

The system includes an active UV disinfection mechanism that destroys pathogens, bacteria, and other biological contaminants – achieving high-level microbial purification with every use.

Dual Filtration System – 2 Compressed Activated Carbon Filters

Performing chlorine absorption, heavy metals, bad odors and tastes – delivering exceptionally clear and tasty water.

Efficient and Elegant Operational Design

Designer stainless steel faucet installed next to the sink, with option to choose additional models. Simple and convenient operation – suitable for any kitchen.

Premium Solution for Daily Family Use

Adapted for regular household consumption – including children, for hot and cold drinking needs, cooking and rinsing food.

Sabbath-Compliant Standard

Approved for use by [Tzomet Institute](#), suitable for Sabbath-observers.

Simple Operation

Operation via electrical connection and regular water pressure. Requires no pumps or external accessories – simple connection for immediate operation.

Family Health Protection

Daily Protection for Your Family's Health

The water flowing from your kitchen tap appears to be clean, but may contain contaminants and bacteria. MR-33 Smart UV performs smart disinfection with every use – so you can be confident that every sip is clean and safe.

Specially developed for Families with Children

Children are more sensitive to contaminations, and unfiltered water may affect their health. MR-33 is designed with features that provide advanced protection for all family members.

Dual Disinfection System – Filtration + UV

Two carbon filters for purifying contaminants, heavy metals, PFAS (eternal chemicals) and bad tastes and odors + UV lamp for bacterial disinfection. A combination that provides safe water for drinking, cooking, and more.

Main Advantages of MR-33 for Families

- Water filter with continuous automatic UV disinfection

- Includes two compressed carbon filters for advanced filtration
- Suitable for daily use by children and adults
- Quiet and convenient operation, no need for complicated maintenance
- High-quality ultraviolet lamp
- Annual maintenance only – saving time and ongoing operational costs
- Convenient, modern, and suitable for any kitchen
- Compact design, easy installation, quiet operation

Suitable for Various Home Uses

- Water for direct drinking from the faucet
- Rinsing fruits and vegetables
- Cooking clean and healthy food
- Use in kindergartens / caregivers / family daycare

▶ 4-Stage Purification Process

1 Stage 1 - Multi-Stage Micron Filtration

Primary 5-micron filtration removes sand, rust, suspended particles, and solids. A secondary activated carbon stage using model OMNIPURE® OMB934-5M helps reduce odors, off-tastes, chlorine, and micro-plastic particles.

2 Stage 2 - Deep Purification at Sub-Micron Level

The final 0.5-micron compressed carbon filter OMB934-0.5ML by OMNIPURE USA treats chemical contaminants, eliminates odors and off-tastes, and helps reduce volatile organic compounds (THM) such as Bromoform, Chloroform, Bromodichloromethane, Dibromochloromethanes, and PFAS.

3 Stage 3 - Protection Against Lead and Heavy Metals

Removes lead as well as organic and inorganic contaminants for safer everyday water use.

4 Stage 4 - Bacterial Purification and UV Disinfection

A powerful [ultraviolet quartz lamp](#) manufactured by Light Sources USA works together with C.P.S (Continuous Purification System) technology to prevent contamination and ensure continuous purification with and after every use.

Laboratory Tests

See Laboratory Tests made by Israeli Standards Institute:

Certifications & Approvals

Israeli Standards Institute Certifications:

[SII - Standards Institution of Israel](#) | **Permit No. 14316**: Filter, chemical purifier

Tested and approved by Israeli Standards Institute laboratories

Adapted for Sabbath observers – certified by [Tzomet Institute](#)

Option to connect to refrigerator with water dispenser / ice production

Technical Specifications

Specification	Value	Description
UV Intensity	44,000Mw/Sec/Cm	Ultraviolet sterilization power
Final Filtration	0.5 micron	Sub-micron filtration level
Min. Pressure	2.0 bar	Minimum water pressure required
Max. Pressure	6.0 bar	Maximum operating pressure
Max. Recommended Flow	2.0L/min	Maximum recommended flow rate
High Quality Faucet	Stainless steel SS-304	Premium dispensing faucet material
Voltage	220V AC	Power supply requirement
Current	1.25A	Electrical current consumption
Frequency	50-60 Hz	Operating frequency range
Wattage	14W	Power consumption
Height	38.0 cm	Unit dimensions
Width	28.0 cm	Unit dimensions
Depth	14.0 cm	Unit dimensions
Weight	3.5 kg	Total unit weight
